

Adventures in Open Source Development

The Good, the Bad and the Ugly

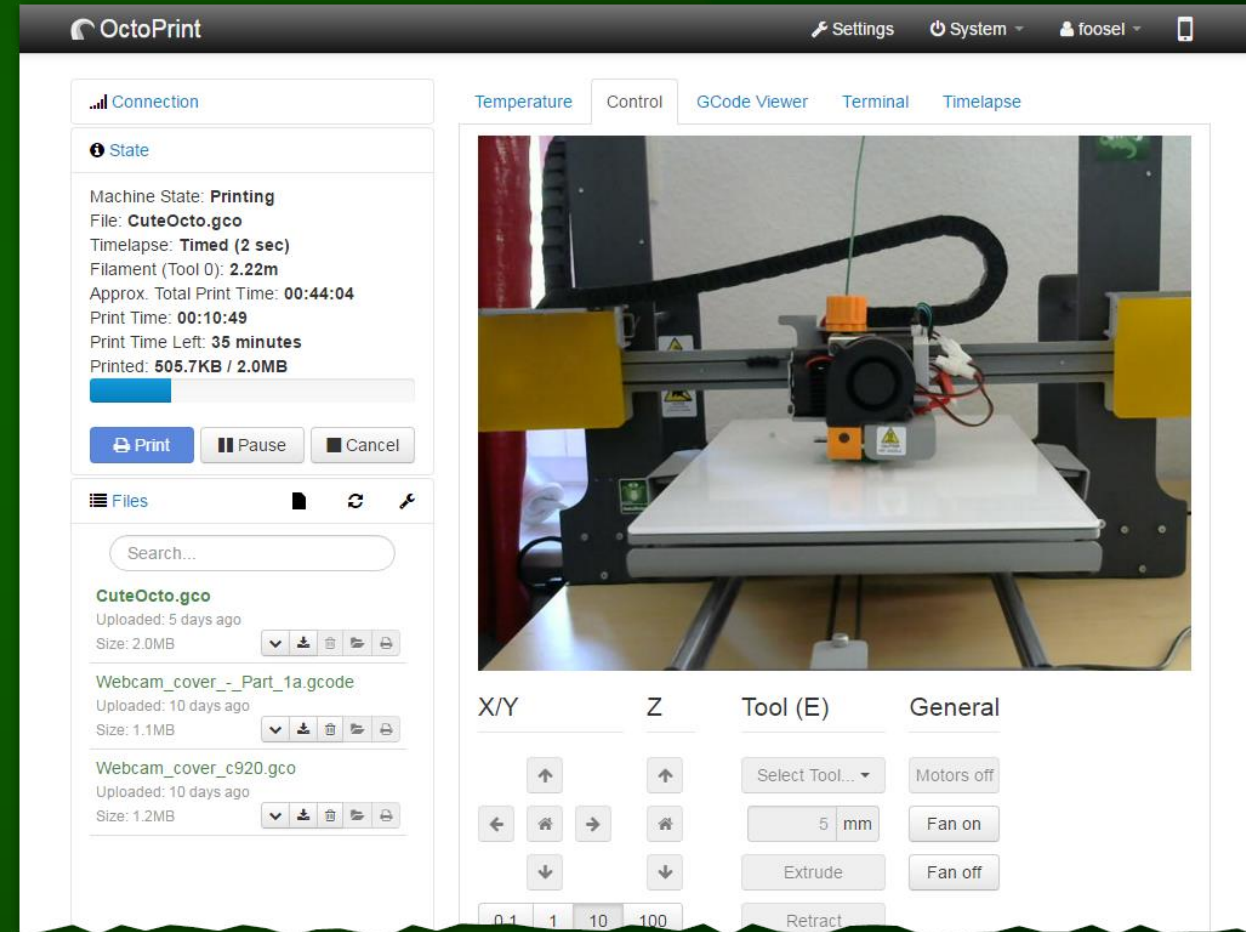

Gina Häußge

- 37 years old
- Software engineer
- Maker
- Hobby baker
- 100% Nerd
- Creator & maintainer of **OctoPrint**

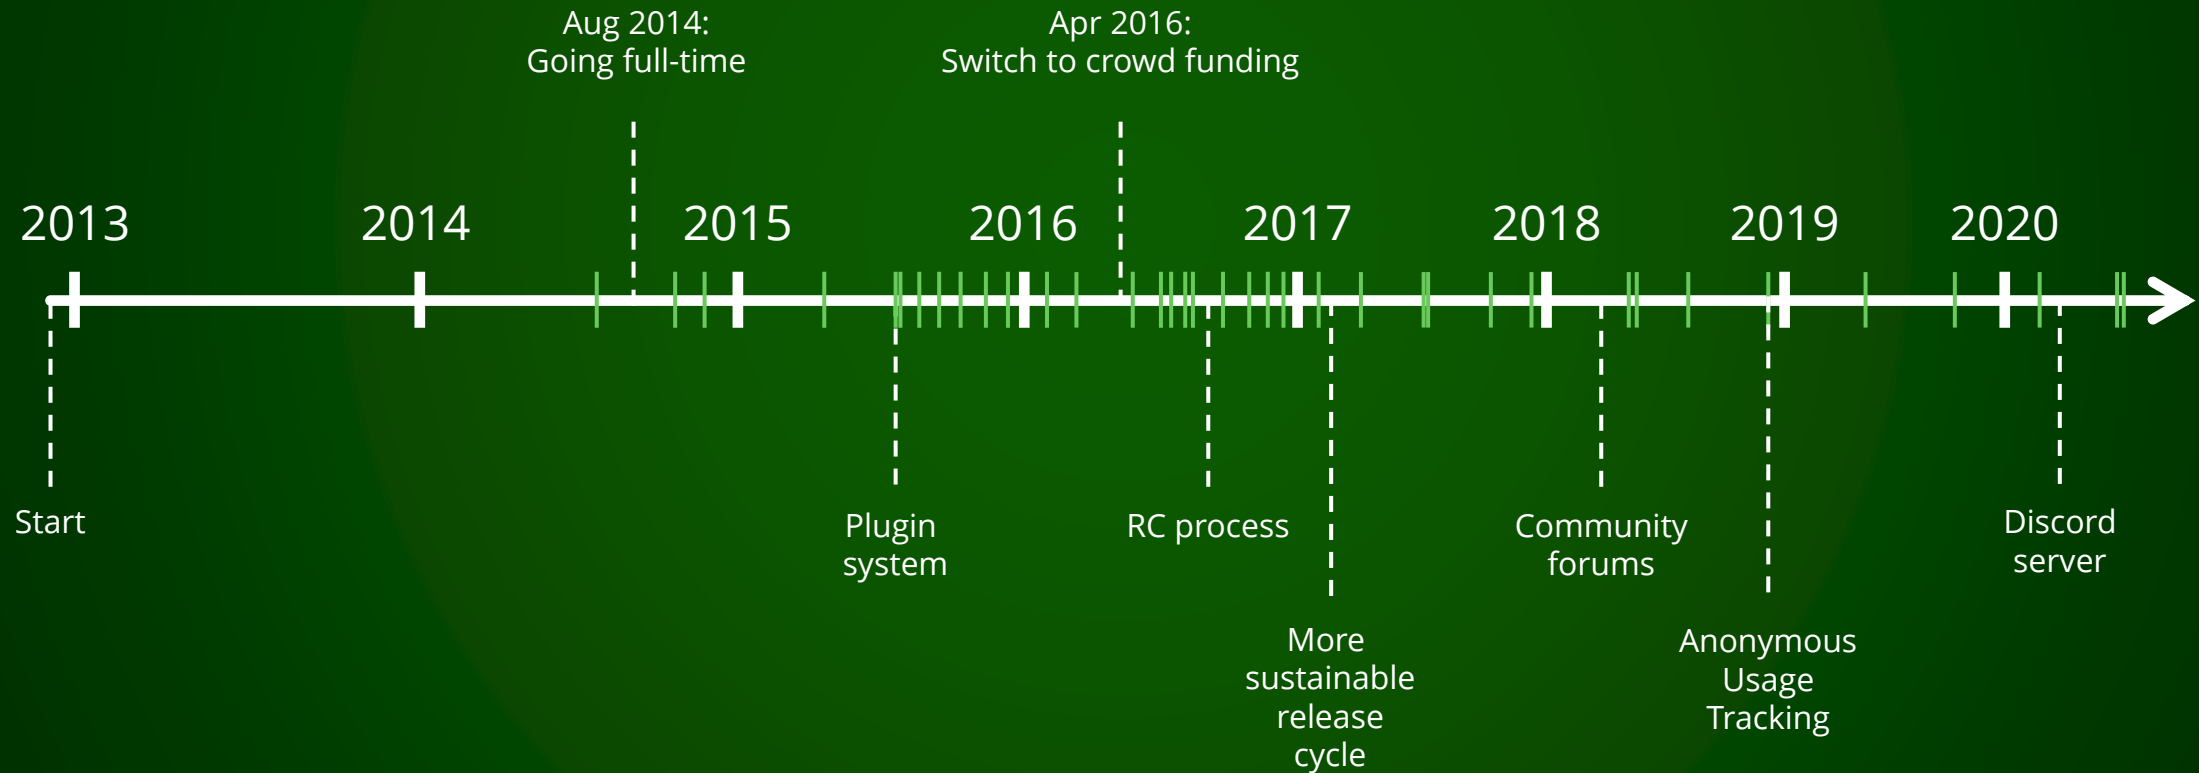

OctoPrint?

- “The snappy web interface for your 3D printer!”
- Open Source, AGPLv3
- ~100k **confirmed** users, unknown actual number
- Python, HTML & CSS & JS
- Web: octoprint.org

Almost 8 years of history

The

Working with passion

- It's **your** project!
- You can shape it, you can implement your vision
- No politics driven architecture
- No working on something you'd never use yourself

Helping people

- You help people solve their problems
- You are an **enabler**
- And sometimes they even say **thank you**: Makes it all worth it!

Learning tons of new stuff!

- Software development
- Project management
- Community management
- Release management
- The value of release candidates
 - and how tricky it can be to get people to actually **run** release candidates...
- Brand development
- ... and so much more

The Bad

Work life balance

- Especially if side project or large project
- Hard to shut off and recharge
- You need to be **very** protective of your private time

Pay

- Asking for donations is tough and doesn't usually scale
- Partnering with companies is an even bigger challenge
- Make it easy for people to give you tiny but recurring tips
- Github Sponsors, Patreon, Liberapay, Donorbox, ...

Solitude

- Especially at the start you'll do it alone
- People are fast to request features, but slow to contribute them
- Beware of having to maintain things you don't or can't use

The Ugly

Entitlement & attacks

“I need it to do X, implement that”

“Fix this obscure bug!”

“Why isn’t this implemented already?!”

“Who ever pushed this release should be ashamed of themselves!”

“F*** YOU!!!”

License violations

- Companies love using OSS
 - They don't love contributing back to OSS
 - And sometimes they don't even admit they are using OSS
- Choose your battles wisely

Burnout

You don't owe anyone anything!

You need to take care of yourself!

Learn to say "No"!

A photograph of a forest path. The path is a narrow, grassy trail that winds through a dense forest. The trees are tall and thin, with sunlight filtering through the canopy, creating a dappled light effect on the ground. The overall atmosphere is peaceful and natural.

Would I do it again?

Absolutely!

Thank you for your attention!
